

2017 MII Basic Training Course Registration

MII is an integrated cost estimating system, including software and associated databases, that meets U.S. Army Corps of Engineers (USACE) requirements for preparing cost estimates. Now being used by many USACE districts, MII will soon be a requirement for all USACE districts and A-E firms performing design work for USACE. Project Time & Cost, LLC (PT&C) works in partnership with the USACE Huntsville Engineering and Support Center to develop and support MII. We have provided MII training and support to more than 1,000 MII users from multiple USACE districts and A-E firms.

With 32 hours of instruction over four days, the MII Basic Training Course covers the basic computerized aspects of cost estimating using the latest version of MII, the Unit Price Book, and other supporting databases and tables, such as crews, equipment, assemblies, labor, etc. Students are required to complete quantity takeoffs and prepare detailed cost estimates, which may require work to be completed outside of regular class hours. A pretest and post test will be given.

Cost per Student

Number of Students	DoD Employees	Non-DoD Employees*
1	\$1,795	\$1,995
2	\$1,695	\$1,895
3	\$1,595	\$1,795
4 or more	\$1,495	\$1,695

*The cost of the course includes one year of MII telephone support and one year of software updates.
