

2017 MII Refresher Training Course Registration

MII is an integrated cost estimating system, including software and associated databases, that meets U.S. Army Corps of Engineers (USACE) requirements for preparing cost estimates. Now being used by many USACE districts, MII will soon be a requirement for all USACE districts and A-E firms performing design work for USACE. Project Time & Cost, LLC (PT&C) works in partnership with the USACE Huntsville Engineering and Support Center to develop and support MII. We have provided MII training and support to more than 1,000 MII users from multiple USACE districts and A-E firms.

With 16 hours of instruction over two days, the MII Refresher Training Course is for cost engineers who have taken the Basic Training Course, but need to brush up on the operation and functions of MII. Students will review all of the aspects of the Basic Training Course, review advanced reporting options, and learn how to use MII more efficiently.

Atlanta Training Dates

PT&C Corporate Office
2727 Paces Ferry Road
Suite 1-1200
Atlanta, GA 30339

February 13-14 (Session R1)
