

# 2019 MII Advanced Training Course Registration

MII is an integrated cost estimating system, including software and associated databases, that meets U.S. Army Corps of Engineers (USACE) requirements for preparing cost estimates. Now being used by many USACE districts, MII will soon be a requirement for all USACE districts and A-E firms performing design work for USACE. Project Time & Cost, LLC (PT&C) works in partnership with the USACE Huntsville Engineering and Support Center to develop and support MII. We have provided MII training and support to more than 1,000 MII users from multiple USACE districts and A-E firms.

With 32 hours of instruction over four days, the MII Advanced Training Course provides advanced instruction on assessing and utilizing MII, including the use of parametric worksheets and quantity linking (parametric modeling). The course also explores estimate structure development and reporting. Students will work with database functions to create site-specific unit prices, modify equipment costs for project-specific circumstances, and adjust crew for overtime and shift differential.

## Atlanta Training Dates

PT&C Corporate Office  
2727 Paces Ferry Road  
Suite 1-1200  
Atlanta, GA 30339

May 13-16 (Session A1)
